

Goals and Objectives

Garfield Elementary Schools

Triple I Program

Students have the opportunity to participate in learning communities that maximize their individual potentials focusing on Science, Technology, Engineering and Math (STEM).

Students will be engaged in learning experiences that enable them to use their creativity, problem solving, critical thinking and logical reasoning to achieve the 21st century skills becoming effective learners, collaborators, communicators and creators.

Students will demonstrate the willingness and ability to plan electronic Differentiated Education Plans (DEP) to monitor and evaluate their own learning experiences and progressions.

Students will interact with their peers in activities and experiences that require high level thinking skills and the elements of STEM.
